

## **REPORT ON BIFOCAL DEPARTMENT ACTIVITY**

To keep abreast with fast paced technology and its latest advancements is challenging task for students. Fields like ARTIFICIAL INTELLIGENCE, DATA SCIENCE & INTERNET OF THINGS are set to bring in revolution in Engineering and technology.

To give exposure to these revolutionary fields, Bifocal department of Wamanrao Muranjan Junior College had arranged online guidance lecture for Science students on the topic of ARTIFICIAL INTELLIGENCE on Saturday 25Th September 2021. This lecture was delivered by IIT GANDHINAGAR ALUMNUS MR. AMEYA DESHPANDE. He has been working in the field of artificial intelligence applications and computer vision in healthcare domain for past four years. He has published six journals & conference papers related to AI & computer vision. He was introduced to students by our Computer Science faculty Rama Warang.

Through his highly informative and interesting speech, Mr. Deshpande made students acquainted with AI field by telling them that apps such as ALEXA, SIRI etc which they use in their day to day life are brainchild of AI. He also guided them about career prospects in the field of AI. Fifty five students who attended this lecture were enthralled to see Deshpande sir's expertise in his field and his ability to simplify these abstract concepts. It was not surprising to notice that Deshpande sir's speech received wrap attention and invoked curiosity for AI in the young minds of students. On the concluding note, our Electronics faculty Dhanshree Shinde thanked guest for introducing students to a new world and also expressed her gratitude to everyone involved in arranging this brainstorming session.
